Office, 28, Lombard-street; Works, Deptford, Kent.

TO ARCHITECTS, BUILDERS, &c.

ATTENTION is requested to the DIRECT ACTION BALL TAPS, invented and patented by T. H. THOMPSON, C.E.

In these Taps the old fashioned lever is done away with, whose lancing action whilst the water was being admitted, soon wore out the cone, and rendered the cock unsound.

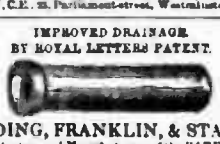
The Direct Action Ball Taps cannot stop up or down, thereby either flooding or leaving premises with no water; a fault which all similar contrivances possess in an eminent degree.

They will fill a reservoir in less time than any other tap of similar dimensions, on account of the water way remaining fully open till the water in cistern is within one inch of the required level, when they shut off without possibility of leakage.

The perpendicular principle, with compensating valve inside, renders this action unerring and perfect under any pressure whatever.

Specimens can be seen in action at the office; and all necessary information, with drawings, forwarded by application to T. H. THOMPSON, C.E., 23, Parliament-street, Westminster.

IMPROVED DRAINAGE. BY ROYAL LETTERS PATENT.



STANDING, FRANKLIN, & STANDING, Sole Patentees and Manufacturers of the PATENT GLAZED STONE WARE SEWAGE PIPE. Offices, 27, Cornhill, entrance in Change-alley; Factory, Brunton's Wharf, Commercial-road, Limehouse.

By employing their patent machinery, S. F. and S. are enabled to produce a pipe for sewage and other purposes in every way far superior to those made by any other process, but more especially in those qualities so absolutely essential to a perfect, and cleanly mode of drainage. From the great and uniform amount of pressure, and peculiar construction of the machinery allowing the air to escape, used in manufacturing, their pipes are entirely free from air bubbles, proving their greater strength, durability, and entirely preventing the contents permeating through; they are much smoother on the inside, insuring a perfect passage for the sewage, and preventing any deposit.

STRAIGHT TUBES WITH SOCKET JOINTS, BENDS, JUNCTIONS, TRAPS, CLOSET PANS, Water, Gas, and Chemical Pipes, Architectural Ornaments, Vases, Chimney Pots, &c. Shipping and Foreign orders executed to any extent.

Specimens may be seen at the offices, 27, Cornhill, where prices, &c., may be obtained, and licenses granted for the use of the patent machine.

PATENTEES OF THE

FLEXIBLE DIAPHRAGM VALVE COCKS,

SHORT STREET, AND 30, NEW-CUT, LAMBETH.

JAMES STIFF, MANUFACTURER of GLAZED STONE WARE DRAIN PIPES, BENDS, JUNCTIONS, TRAPS, &c., 19, HIGH STREET, LAMBETH, LONDON. Established 1751.

Water Closet Pans, with Syphon Traps, 7s. 6d. each.

STRAIGHT TUBES, with Socket Joints, in 3 feet lengths.

The great advantages attending the use of these articles are not so generally understood, as to render any enumeration of them almost superfluous. Their cleanness, efficiency, and durability, are universally admitted; while the rapidly increasing demand for them proves their estimated superiority over every other Earthenware before the public for similar purposes.

Inspection is invited to an assorted Stock of Drain Tubes, of every form and size, adapted to the various situations for which they may be required, as also to the WATER-CLOSET PANS OF IMPROVED CONSTRUCTION, and interior glass far surpassing any other manufactured of Brown stone Ware.

N.B. These are made without the discharge-hole being turned downwards.

May be had also at Messrs. GLADDISH'S LIME WHARFS, Pedlar's Acre, Westminster-bridge; City-road Wharf, City Basin; Dockhead, Bermondsey; Battery Wharf, foot of Battersea-bridge, Chelsea; Pratt Wharf, King's-road, Camden Town.

Drawings and list of Prices will be forwarded on application.
